

TIMBER

Unique ID: MAS-O100031

Object type certainty: Certain

Workflow status: Published

Possible ships timber or part of other marine or land based structure. Truncated rounded timber with hole and evidence of mounting plate for furniture, broken or rotted off at one end exposing heart wood and a knot in the wood. Approximately 2000 mm long and 600 mm in diameter. The undamaged half of the timber appears in good condition, implying a more recent date for the timber, whereas the other part appears to have suffered extensive degradation. The arrangement of damage to the timber suggests it may have been partially submerged during its useful life, possibly as part of a shore based instalment such as a jetty or quay.

Class: Timber **Sub class:** Unclassified worked timber

Chronology

Broad period: MODERN

Period from: MEDIEVAL

Period to: MODERN

Dimensions and weight

Quantity: 1

Length: 2000 mm

Diameter: 600 mm

Discovery dates

Date(s) of discovery: Thursday 9th March 2017
