BOWL

Unique ID: MAS-D100042

Object type certainty: Certain
Workflow status: Published

Fragment of white ceramic bowl or lid marked with black and white geometric design and number '23'. Number appears to be hand-painted or stamped. Found loose on the seabed with a little marine growth present. This is a naval issue bowl probably used for drinking rather than smaller, handled cups, as they were more practical on board a ship. The number refers to the mess number, and the bowls were designed to be stored upside-down. The find dates to the late 19th or 20th century.
