

BOTTLE

Unique ID: MAS-D100071

Object type certainty: Certain

Workflow status: Published

Three aqua coloured glass bottles with tooled lips; for foodstuffs or other household goods; probably dating to the 19th century.

These bottles have a double ring also known as a double collar, double bead, double lip, Davis-type, stacked ring, bead lip with a ring, round band lower flared, broad round collar with lower bevel, inverted double ring, citrate of magnesia finish, double roll collar and stacked ring. This two-part finish is composed of two connected 'rings' - usually with a thicker and slightly wider variably rounded ring at the top of the finish with a thinner and narrower variably rounded to flat ring below. Other variations can have either or both rings somewhat or totally flattened on outside, which is similar to the three bottles recorded here.

This popular finish was used on many different bottle types but was most common on a wide array of medicines, many varieties of liquor flasks and various sauces. Between about 1840 and the 1920s, and particularly between 1850 and 1910, this style of finish was one of the most popular and functional finishes used. It can be found on both mouth-blown and machine-made bottles. The lips or double ring on the bottle seem to be a tooled lip which means the lip was formed in the mould itself rather than applied to the bottle separately. The popularity of this finish was probably a combination of corking strength and relative ease of manufacturing ([Society for Historical Archaeology](#) webpage, accessed September 2017).

Notes:

These items were found with six stoneware seltzer bottles ([MAS-D100065](#)), four stoneware beverage bottles ([MAS-D100066](#)), two green glass wine bottles ([MAS-D100068](#)), one Hamilton bottle ([MAS-D100072](#)), four small stoneware ink bottles ([MAS-D100074](#)), six small bowls ([MAS-D100076](#)) and one egg cup ([MAS-D100078](#)).

All of these items were recovered from the wreck of SS *Strathclyde*, a British trading steamship built in 1871 in Blackwood, Port Glasgow. The ship sank in 1876 off Dover whilst carrying 23 passengers and 47 crew for Bombay, following a collision with *Franconia* and resulting in the loss of 38 lives.

NRHE and Kent HER reference numbers cited in this record refer to the wreck of SS *Strathclyde*.

The location of SS *Strathclyde* was taken from the British National Grid co-ordinate from the National Record of the Historic Environment.

Class: Container **Sub class:** Food and liquid storage container
