

# EGG CUP

**Unique ID:** MAS-D100078

Object type certainty: Certain

Workflow status: Published

One egg cup made of a refined whiteware. The term 'whiteware' is used in historical archaeology to denote refined ceramics with a whiter and denser body than pearlware that generally postdates c.1830. Whiteware is a class of ceramic products that include porcelain and china. They are usually, but not necessarily white and consist typically of clays, feldspar, potter's flint, and whiting (calcium carbonate). It is not until the Victorian era that egg cups were mass marketed and regularly offered with dinnerware services. Companies, like Wedgwood and Haviland, produced egg cups and decorated them in the styles of their bestselling china patterns although the example recorded here appears to be undecorated. It is thought that this example may date to the 19th or 20th century.
